Sofa: Downtime Organizer

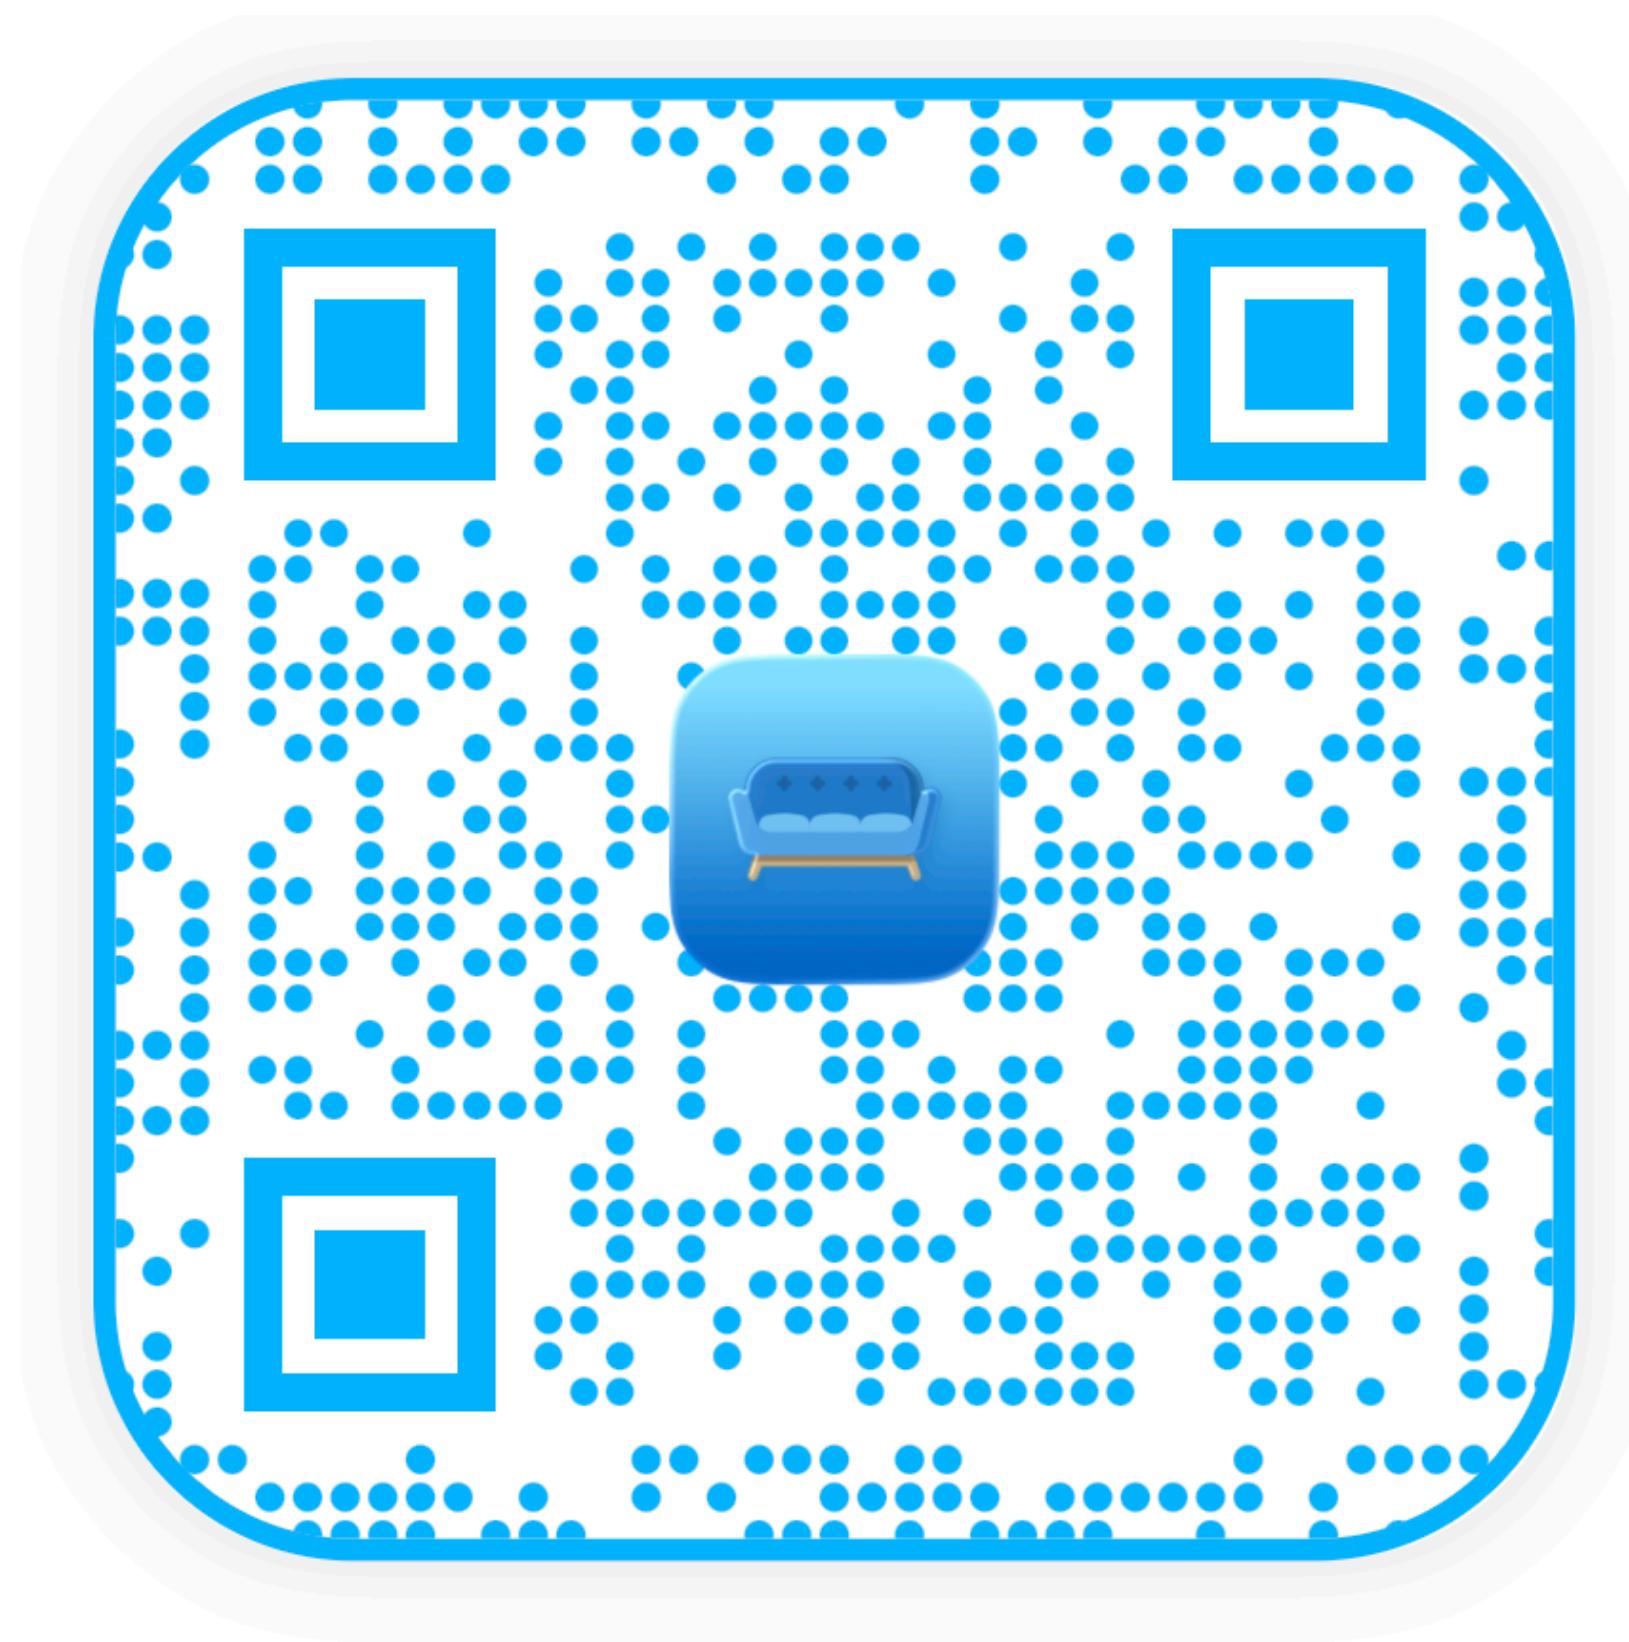

- Indie-style app for managing leisure activities
- Organized lists
- Built-in search for titles with metadata

Great concept, but some UI issues...

Completing missing features

Improving Logbook flow

Refining the search options

Implementing metadata

Adding personalization options

Next steps: Improving animations and transitions

Refining UI consistency across screens

Implement stats and streaks

Preparing a more advanced prototype

Add customized color schemes

Add filtering options inside lists

Next steps:
